

## **Postdoctoral positions available**

We welcome applications from postdoctoral candidates interested in the stability and the dynamics of world trade networks and supply chains.

Priority projects include

- Empirical analysis of supply chains and world trade networks
- Numerical simulations of these systems

This project will be conducted jointly with Marc Barthelemy (IPhT), Philippe Ciais (LSCE), and David Makowski (AgroParisTech, INRAE).

More details about the project can be found at [www.quanturb.com](http://www.quanturb.com)

The postdoc will be employed by the CEA and funding for two years of employment. The hosting laboratory will be the Institut de Physique Théorique which is a joint unit of CNRS and University of Paris-Saclay, and located in Saclay (near Paris).

Review of applications will continue until the position is filled. The successful candidate will hold a Ph.D. by the start date in a physics, applied mathematics, quantitative geography or another field with a strong quantitative analysis component. Applications will comprise the names of three references, an application letter, a CV and a publications list including preprints. Informal inquiries welcome.
